Registration and Pre-Course Instructions:

All students are to be registered on the course registration form.

Introduction:

The course is designed to provide:

- An outline of the legislation relating to working at heights.
- A guide to the options on how to comply.
- A background in how equipment can be utilized to achieve this.
- The details behind the equipment standards, ensuring the equipment is used properly
- The criteria for issue, ID marking, inspection, record keeping, maintenance, storage and withdrawal from service.

Course Syllabus:

- Legislation and standards
 - OSHA and ANSI
- Hazard analysis and risk assessment
- Categories for working at heights:
 - Work Restraint
 - Work Positioning
 - Fall Arrest
- Inspection and record keeping
- Limitation of equipment
- Suspension trauma and the importance of rescue

Course Wrap-up:

Students to carry out a multiple choice test of key points.

Clarification of any points of concern.

Summarize the topics covered during the course.

Assessment of Students:

All students will carry out a multiple choice test covering the key points of the course.

If a candidate gets a total score of less than 80% the trainer will explore the student's knowledge of the topic. A re-test will then be given to determine if the student has attained the minimum goal for passing the course.

Feedback to client upon completion of the course:

Certification is issued for all successful students, valid for three years.

A Photo ID card is issued upon successful completion of each module.

Records to be maintained by SpanSet Inc:

Copy Certificates and ID cards for all successful students, valid for three years.

Copy reports and feedback forms for all candidates including course failures
