

Rescue Mast, Towers & Structures. M4

Duration:

4 hours

Ratio of Trainees to Trainers:

Normally 6:1

Type of Workers to Attend:

- Workers who work at heights on a semi-regular basis.
- Managers/foremen of workers at heights.
- Safety managers.
- Facility engineers who hire contractors who work at heights.

Registration and Pre-Course Instructions:

All students to be registered on the course registration form.

This module is designed as an enhancement of Module 1 and is only carried out when students have successfully completed that module.

Introduction:

The course is designed to provide:

- A practical enhancement to Module 1 to enable the student to carry out a rescue using a pre-selected rescue equipment.
- Instruction in equipment chosen specifically to suit the client's situation.
- A knowledge of alternative types of rescue equipment.

Course Syllabus:

In addition to the theory elements of Module 1, the following topics will also be covered.

- The importance of personal safety while carrying out a rescue.
- The problems associated with suspension trauma.
- The importance of casualty management.

In addition to the practical elements of Module 1 the following topics will also be covered:

- Correct fitting and adjustment of fall arrest harnesses by all students.
- The use of fall arrest lanyards.
- The use of double fall arrest lanyards.

Course Syllabus Continued:

- The use of a rescue kit with raising and lowering capabilities.
- Raising a casualty back up to safety.
- Lowering a casualty down to safety.

Course Summary:

In addition to the test carried out in Module 1, all students will be monitored by the trainer throughout the practical sessions. Any concerns will be addressed by the students and trainer on a continual basis.

The rescue will be carried out in stages and if at any point the trainer is unhappy with the standard attained, the student will be unable to continue. If the matter is resolved, then the student may re-join the course.

Feedback to client upon completion of the course:

Certification is issued for all successful students, valid for three years.

A Photo ID card is issued upon successful completion of each module.

Records to be maintained by safety systems.

Copy Certificates and ID cards for all successful students, valid for three years.

Copy reports and feedback forms for all candidates including course failures.
